The effects of the compound of edible fungus polysaccharides on T cell groups inhibited by tumor and CP in mice/ Liu Changxi, Gao Peng, Qian Jialin, et al. // Chinese Journal of Food Hygiene. – 2000, 12(5): 3~ 6

The effects of compounds of edible fungus polysaccharides(CEFP) i. e. *hericium erinaceus*, *lentinus edodes* and *poria cocos* with equal ratio, with procyanidins oligomers and glycyrrhetinic acid with certain ratio on mice T cell suppressed by tumour and CP was observed. The results showed that the percentage of L_3T_4 , $lyt-2$ and $L_3T_4/lyt-2$ in S-180 group dropped significantly, which were improved by CEFP and saccharides *lentinus edodes* and the CEFP group recovered to normal control. It also showed that CP decreased the ratio of $L_3T_4/lyt-2$ and the L_3T_4 level, but had no effects on $lyt-2$. It was found that therapy effects of CP on tumor mice was effective except for its immunity inhibition. CEFP and saccharides *lentinus edodes* could resist the negative effects of CP significantly and had concord effects. CEFP effects were better than that of saccharides *lentinus edodes* only, which showed the importance of the compounds of antitumor effective substance.

卫生部法监司关于立即查处健男胶囊的紧急通知

各省、自治区、直辖市卫生厅(局):

最近, 我部在组织保健食品监督检查中, 发现生产批号为 990204 的健男胶囊(由辽宁凌海保健品公司申报和生产, 批准文号: 卫食健字[1997]第 486 号, 批准的保健功能: 抗疲劳)在其包装及产品说明书中擅自将适宜人群更改为“成年男性, 尤适用于性功能减退(阳痿、早泄、遗精等), 腰膝酸痛、神疲乏力、心悸失眠等男性人群”, 并宣传“具有明显增加和改善性功能”作用等, 严重误导和欺骗了消费者, 违反了《中华人民共和国食品卫生法》和《保健食品管理办法》的有关规定和《卫生部关于制止保健食品夸大宣传保健功能的紧急通知》(卫机发(99)29 号)的要求。为保证广大群众的健康, 规范保健食品生产经营活动, 现紧急通知如下:

一、各地卫生行政部门在接到通知后, 立即组织对“健男胶囊”进行查处, 该产品生产企业所在地卫生行政部门应依照《食品卫生法》四十五条的规定, 吊销生产企业的保健食品卫生许可证。各地的查处结果请于 2000 年 7 月 30 日前函报我司。

二、各地卫生行政部门要与新闻和工商管理部门密切配合, 坚决制止保健食品的夸大宣传行为。同时要根据《食品卫生法》、《保健食品管理办法》和其他有关规定, 加强对保健食品的监督检查工作, 促进保健食品行业的健康发展。
